Response to Amendment

1. This office action is responsive to communication(s) filed on Jan. 13, 2005.
2. Claims 1-9 are presented for examination.

Claim Rejections - 35 USC102

3. The response has been reviewed but has not been found persuasive as to error in the rejections. Therefore, claims 1-9 are still rejected for the same reason as set forth in the previous Office action.

Response to Arguments

4. Applicants' arguments have been fully considered but they are not persuasive.

Applicants argue that, "Nothing in So et al. shows, teaches or suggest a refresh mark which indicates whether refresh has been performed as claimed in claim 1."The Examiner disagrees with this statement. Because So, starting in column 9, lines 54 and 59 and column 10, lines 44-48, discloses a refresh time indicating when the sector was last refreshed. The refresh control 620 can also monitor memory access ... [the] refresh can be stored on-chip and checked periodically when the memory is powered.

For the above reasons, it is believed that the rejections should be sustained. Feature of an invention not found in the claims can be given no patentable weight in distinguishing the claimed invention over the prior art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2827

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
